

# C# OOP

## Tips & Tricks

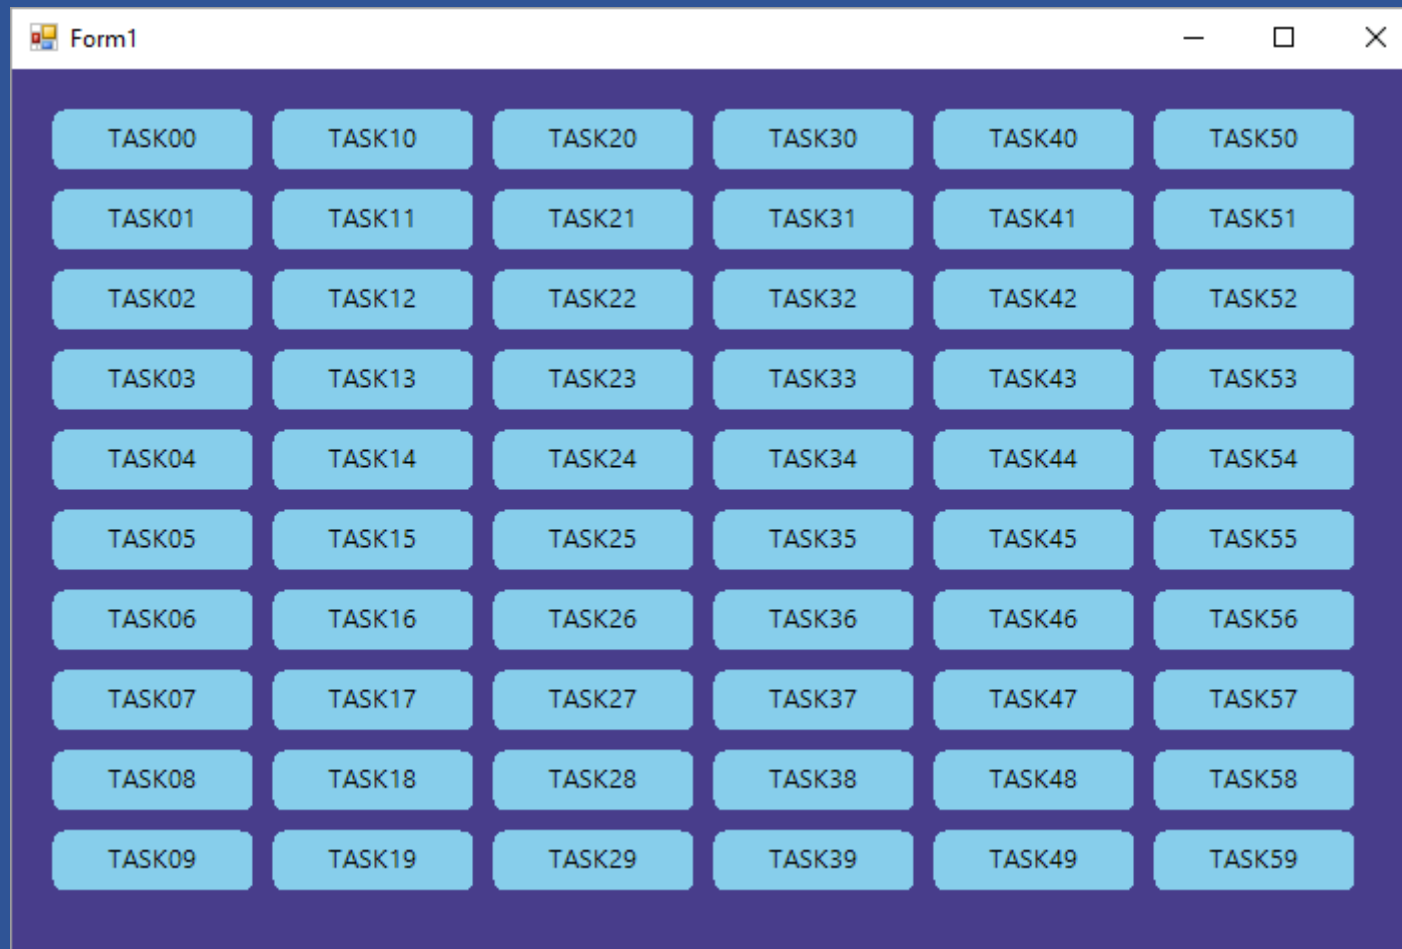

## Tip00090: IEnumerable Interface

Exposes an enumerator, which supports a simple iteration over a non-generic collection.

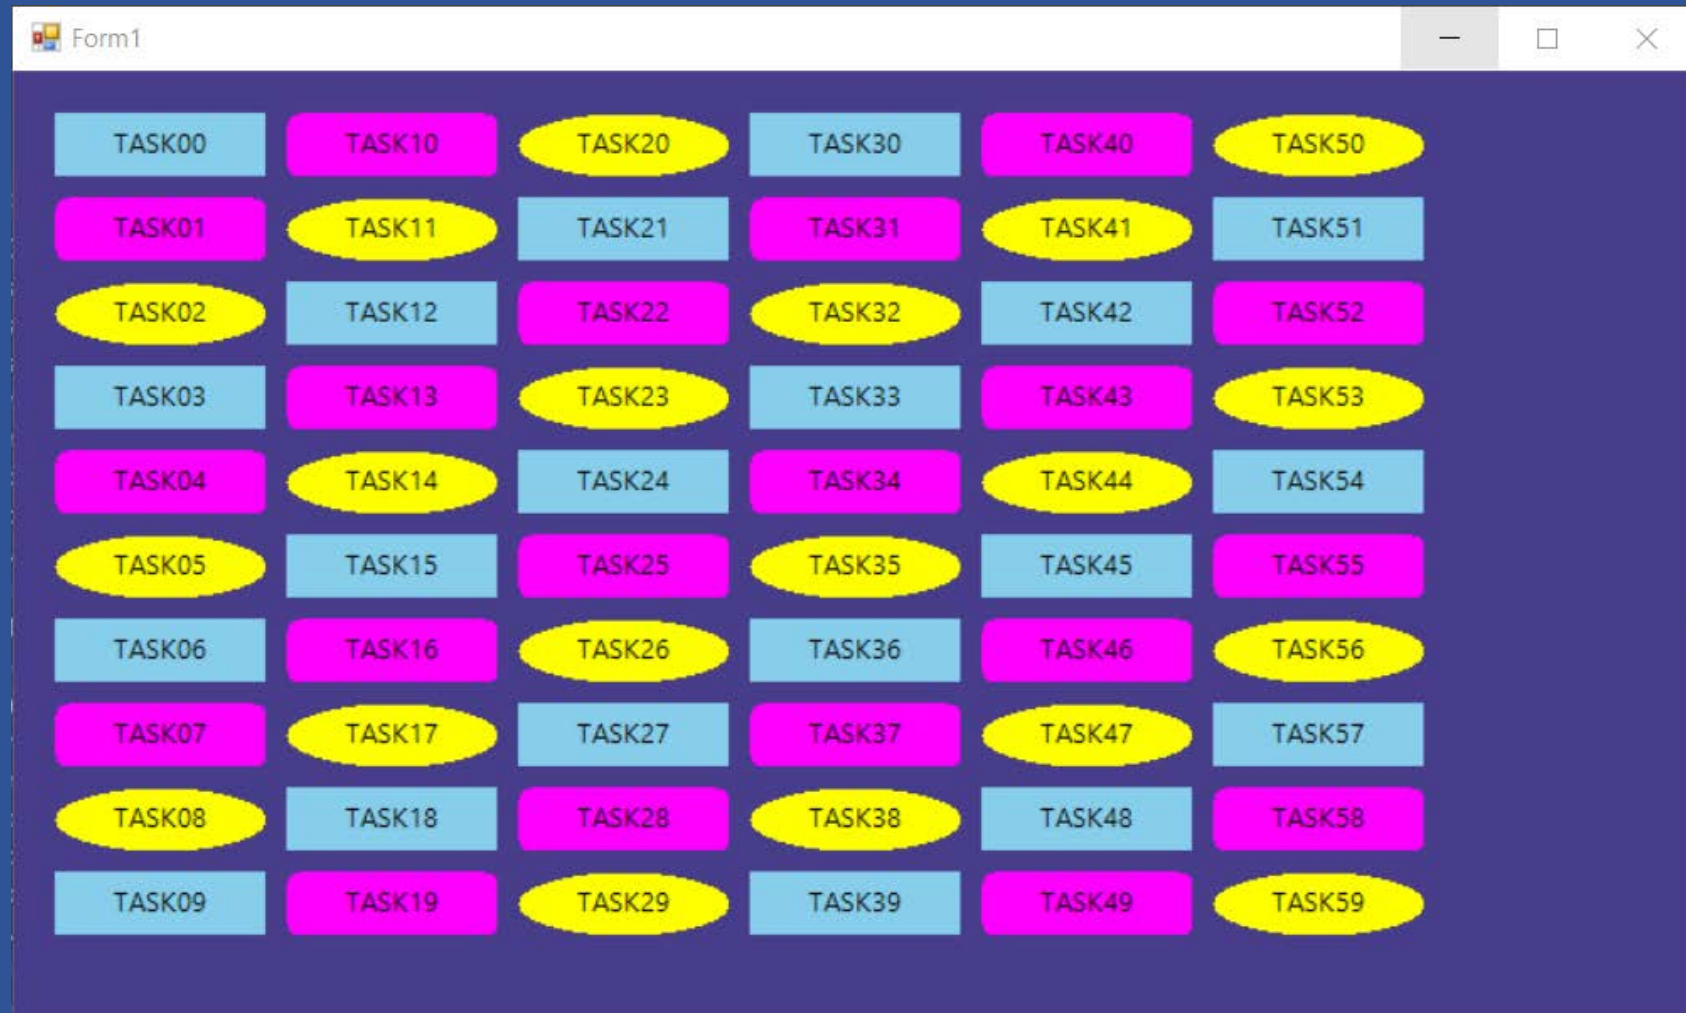

```
Person[] peopleArray = new Person[3]
:
:
new Person("John", "Smith"),
new Person("Jim", "Johnson"),
new Person("Sue", "Rabon"),
:
:

People peopleList = new People(peopleArray);
foreach (Person p in peopleList)
    Console.WriteLine(p.firstName + " " + p.lastName);
```

# Tip00110: IEnumerable & RoundedRect

# Tip00120: IEnumerable & Polymorphism

# Tip4:
